Special '10th Anniversary'

LGC Cruiser Prize

We are excited to have on display the major prize in this year's LGC

Cruiser Grand Prize Pool.

This Hi Performance Chevrolet 350 engine, custom built by The Frankston Engine Centre is based on a 'seasoned' Vortec 4 bolt block that's filled with a balanced rotating assembly, with new bearings, SpeedPro +.30 flat top pistons and a Clive custom hydraulic roller cam completing the short block. Engine builder Dave Butcher has topped the block off with a set of Edelbrock E Street heads delivering a 10:1 comp ratio. Roller rockers, an Edelbrock intake manifold and matched carby complete the top. ARP bolts have been used throughout the build. Fitted out with a gear reduction starter and alternator supplied by Mark McDonald Auto Electrical from Carrum Downs, this ready to start engine is built to produce a streetable 350 to 400 BHP. It just needs some finishing additions to be ready for the draw at the March Cruise Night. The only way to have this hi performance engine sitting in your engine bay is to take out an annual subscription as a LGC Cruiser. If you're not already a subscriber, see Kerin or Jan at the LGC tables, get signed up and get into the draw for this great prize.

Our thanks to Dave from The Frankston Engine Centre for making this great prize possible.

'Weekend to End Women's Cancer' Raffle

At last month's Santa Cruz, many of you supported the fund raising raffle run by the Pink Panthers, who are supporting this major fund raising effort on benefiting research at the Peter Mac Cancer Institute. We have been advised by the girls that the winners of the prizes in this raffle have been notified. They were very appreciative of the support for their fund raising they received on the night, as well as the \$500 LGC donated from the night's gate raffle.

The Pink Panthers complete their fund raising efforts by setting out on their 60 km walk in central Melbourne over the weekend of Feb 28-Mar 1st.
